

# A Self-Financed Summer Training Program

On

## Learning Python Applications Development for Industrial Projects (LPADIP-2019)

From 10<sup>th</sup> June to 6<sup>th</sup> July, 2019

### Objective

The objective of the program is to train our undergraduate, postgraduate and research students of fundamental computer background so that they become ready to cope demands of software industry. Recently, a survey report published in one of the leading newspaper in India claiming that 95 percent of engineers in the country are not fit to take up software development jobs. The adoptability of software developers with fast changes in technologies is the key reason for such huge gap. Our effort to give exposure on python programming is on the way to fulfill this gap. The training program assists students to develop their mini and micro projects. The students can learn and practice the industry skills and prepare themselves for job prospects. The objective of LPADIP training program towards the many skill development programs currently run by central and state government of India such as Pradhan Mantri Kaushal Vikas Yojana (PMKVY), skill India and etc.
