Information Security: Issues and Challenges (ISIC-2021)

December 18 – 22, 2021
(Sponsored by ISEA – II Phase)

Organized by
Department of Computer Science & Engineering, MNNIT Allahabad, Prayagraj, India

Objective

The objective of the program is to bring awareness in the teaching fraternity, who in turn nurture the budding engineers, about the importance and means of information security as well as empower them to safeguard the interest of the nation against cyber-crime by bringing together eminent researchers, educators, engineers and practitioners in the field under one roof.

Tentative topics to be covered

Issues and Challenges in Information Security
Privacy and Security in Wireless Networks
Digital Forensics in Information Security
Web Application Security
Blockchain Technology
Security in Cloud Computing, IoT and Big Data
Open Firewall

Take away of the course

The FDP will provide the knowledge about the tools and methods used to secure data and computer resources that are vulnerable to security threats with emphasis on practical aspects. This will help the teaching fraternity in further exploring the specific security domains and will empower them to meet the challenges in the respective domains. Further, they will be able to disseminate the knowledge among budding researchers, and practitioners for the benefits to the society.
