2.1 HISTORICAL BACKGROUND

Motilal Nehru National Institute of Technology (erstwhile Motilal Nehru Regional Engineering College) Allahabad came into existence in 1960 along with seventeen other Regional Engineering Colleges. The Regional Engineering Colleges had twin objectives, one, to create and nurture engineers and second, to integrate the nation by mandatorily inducting students from all over the country. The governance was shared by the respective State and the Centre. The Institute was affiliated to the University of Allahabad as its Faculty of Engineering, until year 2000. In 2002, the College was renamed as **Motilal Nehru National Institute of Technology** and the governance was taken over fully by the Government of India. In 2007 the Institute was declared as Institute of National Importance by an Act of Parliament. Year 2010-11 celebrated the completion of 50 glorious years of its existence.

The foundation stone of the college building was laid by the architect of modern India, Pandit Jawahar Lal Nehru in 1961 and the building was inaugurated by another illustrious son of the soil Shri Lal Bahadur Shastri in 1965.

In 1961 the first batch of 100 students was admitted to three Bachelor of Engineering (B.E.) programmes, viz. Civil, Mechanical and Electrical Engineering. The Master of Engineering programme (M.E.) began in 1967 with two programmes in Mechanical Engineering followed by three programmes in Civil Engineering in 1971. In 1973 the Institute was identified as Quality Improvement Programme Centre for M.E. and in 1975 for Ph.D., in Mechanical Engineering. The first Ph.D. was awarded in 1975 in Mechanical Engineering. To add a new dimension to itself, the Institute established School of Management Studies in 1996, which offers a two year/four semester post graduate degree programme in Management (MBA).

At present MNNIT is proud to offer nine undergraduate, 25 post graduate (M.Tech., MCA, MBA, MSW and M.Sc.) and doctoral programs in all disciplines of engineering, applied sciences, social sciences and management, to around 4000 undergraduate, 2000 post graduate and 200 doctoral students, through fourteen academic

departments/schools/cells. The students come from all the States as also from many other countries, including SAARC and Middle-east Asia, Europe, USA and New Zealand.

The infrastructure of the Institute is at par with the best institutions in the country; the Computer Centre has state-of-the-art computing facilities, departments have modern laboratories and the library houses print as well digital learning resources. Most of the class rooms are air conditioned and equipped with multimedia pedagogical tools. The entire campus, including hostels, executive development centre and residential area is connected with 1.25 Gbps internet connectivity.

2.2 LOCATION

The city of Allahabad is situated at the confluence (Sangam) of three rivers Ganga, Yamuna and the mythological Saraswati. The earlier settlements of Aryans were established in this city, then known as Prayag; later it became the capital of the glorious Guptas. In 1583, Emperor Akbar built the fort at Sangam, where lies the Ashoka pillar, 11m high dating back to 232 B.C., having inscriptions of Samudragupta and Jehangir. The city was later ruled by the Marathas. It was finally ceded to the British by the Nawab of Awadh in 1801. In the 20th century the city became the nerve centre of India's freedom movement. Allahabad is known for academic ambience and presently houses six national level Institutes/Universities.

2.3 CAMPUS

Hostel area housing hostels for male students, Student Activity Centre and Industrial Estate.

Residential area housing faculty and staff quarters, Executive Development Centre, Girls' hostel, International hostel and Health Centre.

The first Prime Minister of India, Pt. Jawahar Lal Nehru had laid the foundation stone on May 3, 1961.

The main building was inaugurated by another illustrious son of India, late Prime Minister Sri Lal Bahadur Shastri on April 18, 1965. A quiet and congenial atmosphere for studies and research at the highest level prevails in the campus.

The Institute is about 9 km from Allahabad Junction Railway Station and about 4 km from the Prayag Railway station and 16 km from Bamrauli Air Port.

8.5 TECHNICAL EDUCATION QUALITY IMPROVEMENT PROGRAMME (TEQIP-II)

Technical Education Quality Improvement Programme (TEQIP) was envisaged as a long-term programme of about 10-12 years duration to be implemented in 2-3 phases for transformation of the Technical Education System with the World Bank assistance.

As per TEQIP design, each phase is required to be designed on the basis of lessons learnt from

the implementation of an earlier phase. TEQIP-I started a reform process in 127 Institutions. The reform process needs to be sustained and scaled-up for embedding gains in the system and taking the transformation to a higher level. To continue the development activities initiated through TEQIP-I, a sequel Project is planned as TEQIP-II.

Objectives

The Project has following objectives:

- (i) Strengthening Institutions to produce high quality engineers for better employability.
- (ii) Scaling-up postgraduate education and demand- driven Research & Development and Innovation.
- (iii) Establishing Centres of Excellence for focused applicable research.
- (iv) Training of faculty for effective Teaching.
- (v) Enhancing Institutional and System Management effectiveness.

During the year 2014-15 around 27 faculty members attended Faculty Development Programme inside and outside the country (under TEQIP-II). Innovative Research Project sanctioned through office of Dean (R&C) during the period of 2014-15 and financially supported by TEQIP-II funds were around ₹ 70.00 Lakhs. There were around 20 Conferences/Seminars/ Workshops/Short Term Courses conducted in the Institute under TEQIP-II. Equipments amounting to about ₹ 52,37,939.00 were procured from TEQIP-II funds.

8.6 INSTITUTE INDUSTRY INTERACTION (III) CELL

The Institute Industry Interaction Cell was established in the Institute in the year 1989

under the scheme of Institute Industry Interaction, Ministry of Human Resource Development. The main objectives of the Cell are:

- (i) To interact with the industries to know the technology used by them so as to modify the curriculum.
- (ii) To send the faculty members to the industry for training under faculty exchange programme.
- (iii) To offer special courses to the engineers of the industries.
- (iv) To take R & D work from the industries and to involve staff members to deal with the industrial problems.

The Cell is equipped with the infrastructure facilities which are necessary for R & D projects and liaison with industries. The III Cell also promotes staff members to visit industries to get first hand technological information and also identify industrial problems which can be handled by the Institute staff. The Cell also makes constant efforts to develop a win-win relationship with industries.

Fulfilling the above mentioned objectives, some of the activities performed during the year were as follows:

- (i) Memorandum of Understanding (MoU) finalized between Carbon Navigator, Chennai and MNNIT, Allahabad.
- (ii) Project of Solid Waste Management already taken up under this MoU.
- (iii) Discussions for MOU with IFFCO, Phulpur, Allahabad is under progress.
- (iv) Numerous Industries have been contacted and discussions are in various stages for long term MoU.

**Separate Audit Report of the Comptroller and Auditor General of India
on the accounts of Motilal Nehru National Institute of Technology,
Allahabad for the year ended 31 March, 2015**

We have audited the attached Balance Sheet of Motilal Nehru National Institute of Technology (Institute) Allahabad as at 31 March, 2015, the Income and Expenditure Account and Receipts and Payments Account for the year ended on that date under Section 19(2) of the Comptroller and Auditor General's (Duties, Powers and Conditions of Service) Act, 1971 read with section 22(2) of the National Institute of Technology Act, 2007. These financial statements are the responsibility of the Institute's Management. Our responsibility is to express an opinion on these financial statements based on our audit.

2. This Separate Audit Report contains the comments of the Comptroller and Auditor General of India (C&AG) on the accounting treatment only with regard to classification, conformity with the best accounting practices, accounting standards and disclosure norms, etc. Audit observations on financial transactions with regard to compliance with the Law, Rules & Regulations (Propriety and Regularity) and efficiency-cum-performance aspects, etc. if any, are reported through Inspection Reports / C&AG's Audit Reports separately.

3. We have conducted our audit in accordance with auditing standards generally accepted in India. These standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatements. An audit includes examining on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of financial statements. We believe that our audit provides a reasonable basis for our opinion.

Based on our audit, we report that:

- (i) We have obtained all the information and explanations, which to the best of our knowledge and belief were necessary for the purpose of our audit;

(ii) The Balance Sheet, Income and Expenditure Account and Receipts and Payment Account dealt with by this report have been drawn up in new format prescribed by the MHRD, Government of India.

(iii) In our opinion, proper books of accounts and other relevant records have been maintained in the Motilal Nehru National Institute of Technology, Allahabad in so far as it appears from our examination of such books.

(iv) We further report that:

(A) Balance Sheet

(A.1) Five time-barred cheques amounting to ₹ 28.80 lakh were not cancelled and amount written back in account. This resulted in understatement of Bank balance as well as Current Liabilities by ₹ 28.80 lakh.

(A.2) Depreciation amounting to ₹ 93.16 lakh was not charged on assets created out of subsidiaries Fund resulting in overstatement of fixed assets by ₹ 93.16 lakh and surplus by the same amount.

(B) General

(B.1) The Institute has not prepared consolidated asset register.

(B.2) It is noticed that the MNNIT has framed its accounting policy in regard to retirement benefits (i.e Pension, accumulated leave encashment and gratuity) without following actuarial valuation. The same is contrary to the requirement of new format of accounts of MHRD and AS-15 of the ICAI. This needs to be reviewed.

(B.3) The Institute did not reflect the imprest amount of ₹ 7.53 lakh in cash balance as on 31 March, 2015 in contravention of provisions of the Account Code and guidelines of the MHRD.

(C) Grants-in-aid

During the year 2014-15, the Institute received grant of ₹ 113.64 crore from Government of India (Plan ₹ 49.04 crore + Non-Plan ₹ 44.00 crore + IRG ₹ 20.60 crore). The Institute had an opening balance of ₹ (-) 6.20 crore (Plan (-) ₹ 20.44 crore + Non-Plan ₹ 14.24 crore). Thus, total fund available with the Institute worked out to ₹ 107.44 crore, out of which the Institute utilised ₹ 106.27 crore (Plan ₹ 44.28 crore +

Non-Plan ₹ 61.99 crore) leaving a balance of ₹ 1.17 crore (Plan (-) ₹ 15.68 crore + Non-Plan ₹ 16.85 crore) as on 31 March, 2015.

(v) Subject to our observation in the preceding paragraphs, we report that the Balance Sheet, Income and Expenditure Account and Receipts and Payment Account dealt with by this report are in agreement with the books of accounts.

(vi) In our opinion and to the best of our information and according to the explanations given to us, the said financial statements read together with the accordingly policies and notes on accounts, and subject to the significant matters stated above and other matters mentioned in annexure give a true and fair view in conformity with the accounting principles generally accepted in India.

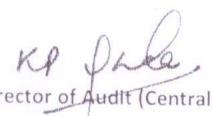

(a) In so far as it relates to the Balance Sheet, of the state affairs of the Motilal Nehru National Institute of Technology, Allahabad as at 31 March, 2015, and

(b) In so far as it relates to Income and Expenditure Account of the 'surplus' for the year ended on that date.

Annexure

1. Adequacy of Internal Audit System.

Although Internal Audit of the Institute was carried out, it was limited to pre checking of bills and vouchers. Internal audit was conducted in an adhoc manner without formulating an Audit Plan. The Institute has not prepared the Internal Audit Manual as of date. In view of above the Internal Audit System appears to be inadequate.

2. Adequacy of Internal Control System.

Internal Control System in the institute reflected following deficiencies:-

- Non conducting of PV of Fixed Assets and Inventory and non deposit of Income Tax.
- Non-formulation of investment policy and parking surplus funds of ₹ 12.55 crore in Current Bank account.
- Non-creation of Depreciation Reserve Fund.

In view of above internal Control System needs to be strengthen.

3. System of Physical verification of Fixed Asset.

No physical verification of fixed assets was conducted during the year and hence the existence of these assets could not be vouched in audit.

4. System of Physical Verification of Inventories.

No physical verification of inventories was conducted during the year 2014-15.

5. Regularity in payment of statutory dues.

The Institute paid its statutory dues during the year except Income Tax of ₹ 10 lakh pertaining to Research and Consultancy Cell.

 - v. To gather information about past evolutionary events

Inverted microscope with camera (cell culture grade)

Make : Dewinter

Uses

- i. Inverted microscopes are used in micromanipulation applications where space above the specimen is required for manipulator mechanisms and the micro tools they hold, and in metallurgical applications where polished samples can be placed on top of the stage and viewed from underneath using reflecting objectives.
- 7
- ii. Inverted microscopes are useful for observing living cells or organisms at the bottom of a large container (e.g., a tissue culture flask) under more natural conditions than on a glass slide, as is the case with a conventional microscope.
- iii. An inverted microscope gives you greater freedom than an upright one. It provides the better clue about the diversity of life and its interaction on a microscopic level.
- iv. Inverted microscopes enable to look at more samples in a shorter period of time
- v. With an inverted microscope, you cannot crash an objective into the sample
- vi. Inverted microscopes save you time and money in sample preparation
